SUMMARY

Final-year Cyber Security undergraduate with practical experience in developing security tools, analyzing network traffic, and building multi-protocol honeypots. Proficient in Python, JavaScript, SQL, and modern cybersecurity tools. Strong leadership, problem-solving, and project management skills with a keen interest in Security Operations (SOC), Threat Intelligence, and Digital Forensics.

EDUCATION

- Sathyabama Institute of Science and Technology — CGPA - 8.25 — 2023 - 2027
  B.E Computer Science and Engineering (Cybersecurity Specialization)
- R N Podar High School (Mumbai, India) — 66.8 % — 2021 - 2023
  Higher Secondary
- Podar International School (Mumbai, India) — 89 % — 2016 - 2021
  Secondary

PROJECTS

1. **Multi Protocol Honeypot Network**

- Developed a multi-protocol honeypot simulating SSH, HTTP, FTP, SMB, MySQL, and Redis services to capture and analyze attacker activity.
- Built a concurrent Go backend with REST APIs, WebSocket streaming, and an event-driven architecture for real-time event processing.
- Developed a React dashboard to visualize attack events, MITRE ATT&CK mappings, and session replays in real time.

2. Network Packet Analyzer and CTF Flag Extractor

- Developed a Python-based desktop application to analyze network packets and extract useful information from captured traffic.
- Implemented packet parsing and filtering features to simplify network traffic analysis and protocol inspection.
- Built automated tools to decode and reconstruct hidden or encoded flags commonly found in Capture The Flag (CTF) challenges.

SKILLS

- Programming: Python, SQL, HTML, CSS
- Cyber security: Windows, Linux, Wireshark, Burp suite, Nmap, MITRE ATT&CK, Splunk, SIEM.
- Language : Tamil (Fluent), English (Fluent), Hindi (Fluent)
- Soft Skills : Leadership, Communication, Decision-making, Problem solving, Time management.

PRACTICAL EXPERIENCE

Secretary, OWASP Student Chapter

- Led the planning and execution of 5+ national-level cybersecurity events, including CTFs and hackathons
- Managed a cross-functional team of 30+ volunteers to deliver large-scale events on schedule and ensure smooth operations.
- Coordinated industry speakers, mentors, and judges from organizations.
- Increased student engagement through hands-on cybersecurity activities, CTFs, and workshops, strengthening the OWASP student community on campus.

ACHIEVEMENTS & CERTIFICATIONS

- TryHackMe - Cybersecurity 101:Practical Knowledge in Network security, Cryptography Techniques and Tools.
- TryHackMe - SEC 1: Demonstrated hands-on technical proficiency in network security, web application vulnerabilities, Linux/Windows administration, and fundamental defensive/offensive strategies.
